https://www.linkedin.com/in/chinmaya-sree-kota-3309aa381/

PROFESSIONAL SUMMARY

Industrial Biotechnology undergraduate with knowledge of molecular biology, microbiology, and basic laboratory techniques. Worked on an academic project focused on identifying lead molecules against the Zika virus using molecular docking studies. Familiar with DNA/RNA extraction, gene expression analysis, and laboratory instrumentation handling. Interested in pharmaceutical and biotechnology roles, with a strong willingness to learn, adapt, and contribute in research and laboratory environments.

EDUCATION

Bharath Institute of Higher Education and Research **2022 – 2026**
Bachelor of Technology in Industrial Biotechnology (**CGPA** – 8.9/10.0)
[Tambaram, TN]

GDMM Junior College **2020 - 2022**
Board of Intermediate Education, Andhra Pradesh (**Percentage**: 79.7)
[Nandigama, AP]

Narayana English Medium High School **2019 - 2020**
State Board of Secondary Education (**Percentage**: 99.5)
[Nandigama, AP]

TECHNICAL SKILLS

- **Biotechnology Skills:** Molecular biology, microbiology, biochemistry fundamentals, and aseptic laboratory practices
- **Laboratory Exposure**: DNA/RNA extraction, sample preparation, laboratory equipment handling, and basic analytical techniques.
- **Research Abilities:** Scientific documentation, literature review, experimental observation, and data interpretation.
- **Soft Skills:** Teamwork, leadership, effective communication, problem-solving, time management, and critical thinking.
- **Languages**: Telugu, English, Hindi, Tamil

PROJECTS

Zika Virus NS3 Protein Inhibitor Identification System

- Worked on a computational drug discovery project to identify potential inhibitor molecules targeting the NS3 protein of the Zika virus.
- Performed virtual screening, molecular docking, and protein–ligand interaction analysis using tools like AutoDock Vina, PyMOL, and Open Babel.
- Conducted ADME and drug-likeness analysis using SwissADME and pkCSM to evaluate bioavailability, toxicity, and pharmacokinetic properties of shortlisted compounds.
- Executed Molecular Dynamics (MD) simulations using GROMACS and analyzed RMSD, RMSF, hydrogen bonding, and structural stability to identify promising antiviral lead molecules.

Terminalia catappa Based Wound Healing Study Using Zebrafish Model

- Conducted wound healing studies using the zebrafish caudal fin regeneration model.
- Performed phytochemical, antioxidant, and anti-inflammatory analysis of *Terminalia catappa* leaf extract.
- Analyzed tissue regeneration and histopathological changes to evaluate wound healing activity.
- Developed a herbal cream formulation and gained hands-on experience in biomedical laboratory research.

CERTIFICATIONS

- **Bioinformatics for Biologists:** Analysing and Interpreting Genomics Datasets – Wellcome Connecting Science (FutureLearn) *Certificate Link*
- Vaccine Vial Monitors (VVM) – UNICEF (Agora) *Certificate Link*
- Molecular Biology Workshop – Royal Bio Research Centre *Certificate Link*
- I Think Biology – NPTEL (IIT Madras) | Elite *Certificate Link*
